

File 1501

Mr. Henry Merritt

February 27, 1968

Thelma C. Heatwole

Patents - Additives to Tobacco or Reconstituted Tobacco

I am enclosing the results of a survey of our files concerning certain types of additives. In 1965 we did a very thorough search on additives and since that time, we have had a number of additions to the list. I would say that this survey is an "in-depth" search on the specific subject of inorganic anions, organic anions, and metallic cations as additives in filler.
